

Position: Environmental Engineer
Project Location: Philadelphia, PA
Status: Full-Time (exempt)
Compensation: Salary

Sci-Tek Consultants, Inc., a civil, environmental, and geotechnical engineering and surveying firm is seeking a mid-level Environmental Engineer for Municipal Separate Storm Sewer (MS4) support, planning and technical analyses based on regulatory requirements for compliance of stormwater permits and other related work as required. The successful candidate will perform assignments of limited but increasing scope and complexity to develop the knowledge and abilities of the engineer. The assignments require evaluative thinking and are carried out in accordance with standard engineering practices and general work instruction. Completed work is used as a basis by others to further engineering projects. The work performed is under the supervision of a higher-level engineer.

Minimum Requirements

- Bachelor's degree from an accredited college or university with major course work in environment, civil or chemical engineering
- Make engineering computations, sketches and engineering drawings
- Interpret and check design details, estimates, engineering plans and specification for accuracy of engineering details
- Effectively express ideas verbally and in writing
- Attention to detail and adherence to deadlines

Preferred Qualifications

- Ability to analyze state and federal stormwater best management practice requirements and guidelines and apply to current implementation
- Experience with H&H modeling (either professionally or through coursework)
- Experience with GIS-based watershed modeling tools (i.e. MapShed)
- Ability to manipulate and present data in database management software (Access or SQL Server)
- Programming skills in Visual Basic, Python, MatLab

Sci-Tek offers competitive compensation including health benefits and 401K Profit Sharing Plan and is an equal opportunity employer that seeks to be a premier provider of innovative, value-added solutions to its clients' many challenges through the application of civil, geotechnical, and environmental engineering and surveying.
